## **DETAILED ACTION**

## Allowable Subject Matter

1. Claims 1-8 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the claim limitation in claim 1 of "determining a read clock signal based on the number of sets of identified rows and successively selecting, at the frequency of said read clock signal, each line corresponding to the rows of the sets of rows identified for the pixel activation," and similarly in claim 7 of "means for identifying, among sets of memory rows, set of rows for which at least one memory point of a row in the set being in the activation state, a means for providing a read control signal transmitted to the addressing means, the frequency of which depends on the total number of rows of the identified row sets," mean that the memory would need to have at least two sets of rows each consisting of more than one row. This means that the read clock signal would need to be based upon at least the 2 sets, this limitation not being found singularly or in combination within the prior art.

The closest prior art references are Aratani et al. (US 5,929,831) and Morita (US 2002/0196243). Aratani discloses of identifying points in memory that are set for activation, however, Aratani does not teach that his clock signal is based upon a

number of **sets** of identified **rows**. Morita discloses of identifying points in memory that are set for activation, and only scanning the lines set for activation, however, Morita is silent as to whether the clock frequency for scanning is changed based upon the scanning line detects, and therefore he fails to teach the limitation of "determining a read clock based on the number of sets of identified rows" as presented in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen G. Sherman whose telephone number is (571) 272-2941. The examiner can normally be reached on M-F, 8:00 a.m. - 4:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amr Awad can be reached on (571) 272-7764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
